Management**

The investment officer shall exhibit prudence and discretion in the selection and management of securities. Skill and judgment shall be exercised in order that no individual or group of transactions undertaken would jeopardize the total capital sum of the overall portfolio. The College District shall not allow speculation (such as anticipating an appreciation of capital through changes in market interest rates) in the selection of any investments. The investment officer shall observe financial market indicators, study financial trends, and utilize available educational tools in order to maintain appropriate managerial expertise.

**Liquidity and
Diversity**

To meet the investment objectives of the College District, the maturity of investments shall be targeted to coincide with the cash flow needs of the College District.

Assets of the College District shall be invested in instruments whose maturities do not exceed one year at the time of purchase. The investment portfolio shall be diversified to reduce the risk of loss of investment income from overconcentration of assets in a specific issue, a specific issue size, or a specific class of securities.

Nevertheless, the College District recognizes that in a diversified portfolio, occasional measured losses are inevitable and must be considered within the context of the overall portfolio's investment return. Also, it is intended that investments in all funds shall be managed in such a way that any market price losses resulting from interest rate volatility shall be offset by income received from the balance of the portfolio during a 12-month period.
