

FIRE SCIENCE TECHNOLOGY DEGREE

Weatherford College offers two A.A.S. degree tracts. Upon successful completion of the fire academy, students have the option to enter into one of the two A.A.S. degree programs utilizing the semester credit hours awarded within the fire academy program. The Fire Protection and Safety Technology A.A.S degree gives

students an expanded knowledge base to help them improve as firefighters. The Fire Services Administration A.A.S. degree helps prepare the firefighter for their move into supervision and/or helps the supervisor improve in their role as an administrator.

MISSION STATEMENT

To assist the career, volunteer, and industrial fire protection and emergency services throughout Texas to deal effectively with the social, economic, and technical aspects of fire and emergency response and to enhance their professionalism and capabilities to protect Texas from the devastation of fire, environmental, natural and man-made emergencies by providing state of the art education, training, resources, certification and leadership.

From the Director of Fire Science Technology

The Fire Science Technology program at Weatherford College prepares students to become competent practitioners in the fire service. WC's comprehensive program also provides current professionals with continuing education opportunities for career enhancement.

The Fire Science Degree at Weatherford College is an online program and free to all qualified firefighters in the State of Texas.

All courses are developed and presented with the approval of the Weatherford College Fire Science Technology Advisory Committee, comprised of fire service professionals and interested citizens in the college's service area. Weatherford College graduates work for and have secured positions with an assortment of local, county, state and fire service agencies.
